OBJECTIVE

A budding professional pursing graduation in BE in computer science and engineering from HKBK college of engineering. Fortes include coding in multiple languages, database, logical thinking & ability to deliver under pressure.

PROJECTS

- **Result Management System:**
  The aim of this project is to make a web application which display various details with respect to student result. The project has been developed using HTML CSS for making the webpage PHP and MySQL as the backend to maintain the database and the interaction with the frontend.
- **Event Booking System:**
  Event management is the application of project management to the creation and development of small and or large-scale personal or corporate events such as ceremonies, weddings. This project has been developed using React.js for making webpage and MySQL as the backend to maintain the database and the interaction with the front end.
- **Netflix Clone:**
  This is a clone of Netflix website built using *React.JS* as a Front-end & *Firebase* as Back-end. It's not a replica, and it doesn't have all the features of Netflix website. it's a similar version of Netflix with my own design touch, showing my abilities in React.JS to build something advanced like Netflix. It contains the home page, sign-in page, sign-up page, browse page, and movie player.
